

# AssistEdge RPA

## Design Studio

Simple to use UI based workflow like configurations, for enterprise applications

## Control Tower

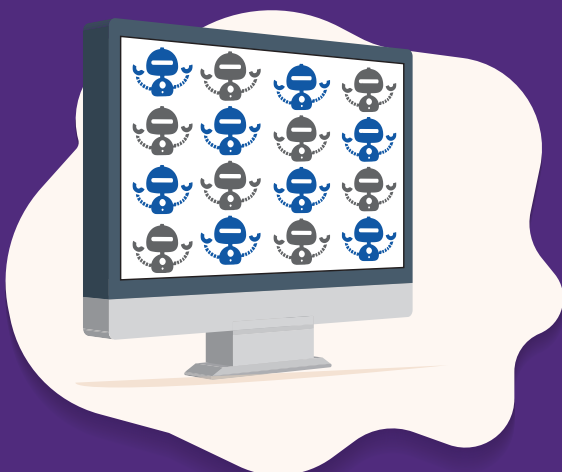

Real-time central robot management and monitoring for complete control on automations

## Automation Effectiveness

Enterprise class reporting and insights for auditing and tracking program effectiveness

## Infrastructure Footprint

Run multiple bots on a single machine to reduce overall infrastructure overheads

## Enterprise Security

AES 256-bit encryption, credential vault management and SSL/TLS 1.2 transport level encryption
